

## IT'S EASY Being Green (design)

Planet-friendly decor and high style are not mutually exclusive, as demonstrated by Green Dwellers, South Florida's first contemporary retail boutique to offer exclusively green products and design services. The chic Plantation shop carries a bevy of cool items, from bedding, bath and dining paraphernalia to decorative accessories, specialty gifts and goods for kids and pets. Where else can you find recycled traffic light pendants and tea sets made from recycled milk jugs? The store also offers educational workshops and green-themed parties and baby showers. And while owner Mylene D'Arelli has yet to trade in her SUV for a hybrid, she does recycle, use compact fluorescent bulbs and clean with nontoxic products. "Doing a little is better than doing nothing," she says. Indeed. Check out [greendwellers.com](http://greendwellers.com).
